

White Finish Model

Wood Finish Model

Our Floorline LTC is the optimal bed solution for home care use or long-term care facilities. Its one piece design makes it easy to fold, store and transport. The Floorline LTC comes in two convenient options including one with a wood-grain finish that compliments any room.

Clinical and Patient Benefits

The Floorline LTC lowers to a distance of 9.5cm/3.7" from the floor. This distance, although seemingly small, has enormous benefits to both the patient and the facility. By just adding 5cm to the distance between the bed and the floor, the impact force of a fall is increased by 50%. This can be the difference between a simple bruise or a fractured hip for the patient that may result in an extended hospital stay or even death. In addition to the physical effects, fall injuries also have psychological effects on the patient as they experience a loss of confidence and fear after a fall.

Optimal Features

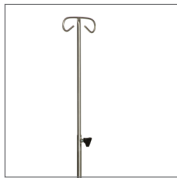

The Floorline LTC features standard positions

normally found only on hospital beds, such as Trendelenburg, reverse Trendelenburg and cardiac positioning. With a full assortment of accessories, an easy-to-use handset, and durable LINAK electronics, the Floorline LTC is the best choice for patient care.

Quality

Our products are designed and manufactured to meet all the requirements of relevant standards. At every stage of the development process, every single product is given extensive attention in design, development and manufacturing. This means that a user of this product feels confident with its reliability and the caregiver feels confident with its safety.

Accessories

IV Pole

Adjustable height. Can be mounted on either end of bed. Maximum SWL 7kg/15.4lb. Part no. IVP

Care Assist Rail

Designed to assist patients safely in and out of a bed. Ergonomic design. Part no. 90702

Extension Kit

Extends bed by 17.5cm/7" for taller patients. Part no. 90709

Handset

Five function - included with bed. Part no. 75746
Handset holder Part no. LC2250, Lock Out Key Part no. 75790

Self Help Pole

Assists patient moving within confines of bed. Maximum SWL 75kg/165.3lb. Part no. SHP600

Side Rails

Available in 1/4 size [Part no. 72790], 1/2 size [Part no. 72791], Split 1/2+1/4 size [Part no. 72792], and 3/4 size [Part no. 72793]

Wall Bumper Bar

Protects the head of the bed. Mounted on lower support bracket between wheels. Part no. 90705

Oxygen Holder

Carries C size tank. Attaches to legs. Part no. 90707

Features

Compact

Folds compactly for storage or transport.

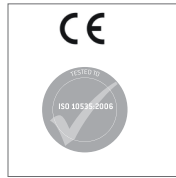

Standard Positions

Includes auto-contour, backrest, kneebreak, Trendelenburg, reverse Trendelenburg, cardiac.

Premium Casters

One central locking and three steering/directional casters for premium maneuverability.

Manufactured to all relevant standards including IEC 60601-2-52:2009, EN1970:2002, AS/NZS 3200.2.38:2007
